Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Exd RMf

FORM A2.
BRITISH RAINFALL.

1 JAN 1910

Kept at The Holmes, Betchworth

in the County of Surrey

by J. R. Rushton

RAIN GAUGE
Pattern "Symonds'"
Diameter of top 5 in.
Height of top above Ground – ft. 8 in.
" " " Sea Level 322 ft.

Time of Observation 9. a. m

Nearest Railway Station
Name Betchworth
Distance 348 Direction S. S. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.

BRITISH RAINFALL. 1 JAN 1910

Kept at Sandhills Betchworth

in the County of Surrey

by C. J. Whittington

RAIN GAUGE { Pattern
Diameter of top ..... in.
Height of top above Ground ..... ft. ..... in.
„ „ „ Sea Level ..... ft.

Time of Observation 9. 0

Nearest Railway Station { Name Betchworth
Distance 1 m. Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

2 FEB 1911

REGISTER OF RAINFALL IN 1910

Kept at Sandhills Betchworth

in the County of Surrey 5

by C. J. Whittington

Pattern

RAIN GAUGE Diameter of top ..... in.

Height of top above Ground ..... ft. ..... in.

" " " Sea Level ..... ft.

Time of Observation

Nearest Railway Station No Name

Distance ..... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

13 JAN 1910

Kept at Bletchingley House Bletchingley
in the County of Surrey
by Canon A H L Barwell

RAIN GAUGE
Pattern Common pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 530 ft.

Time of Observation 9. a. m
Nearest Railway Station
Name ~~Redhill~~ Nutfield
Distance 2 miles Direction S. W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

My dear Sir

I must apologise for not having replied to yours of the 26th before today, but I have been away from here for some days past. It is too long ago for me to verify the records in question but doubtless I have made some mistake such as you suggest. My actual recorded dates are as I give in my return

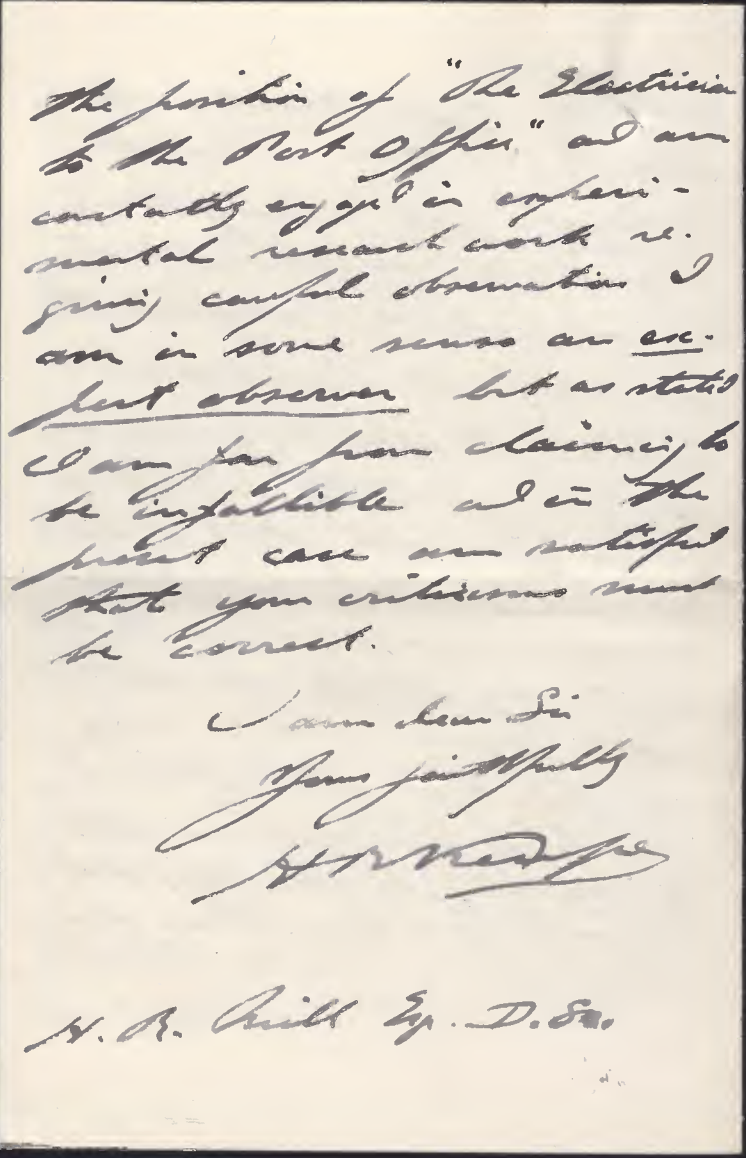
April 3rd/09

My dear Sir

I must apologise for not having replied to yours of the 26th, before today, but I have been away from here for some days past. It is too long ago for me to verify the records in question but doubtless I have made some mistake as you suggest. My actual recorded dates are as I give in my return viz Jan 4-5 and Jan 7 but in view of what you state, these dates should probably be Jan 7-8 and Jan 9, but as stated I am unable to verify this. I may state however that in several instances I have (as the result of conversation with residents I have met) observed that a striking difference in rainfall has on more than one occasion been noticeable between my own observations and that of my neighbours i.e. the remark has been made that

whereas a particular lo-
cality has been almost
deluged, yet a neighboring
area ([illegible]) has almost entirely
-if not entirely- escaped the
shower, and vice versa.

I do not claim, of course,
to be infallible, and it is
quite possible that I have
made (indeed must have
made) mistakes as to dates,
but my totals are, I believe,
quite correct; it is very
rarely indeed that the ob-
servations are not made
by myself personally, and
I am most careful in being
sure of them. As I told



the position of "The Electrician to the Post Office" and am constantly engag^d in experimental research work requiring careful observation I am in some sense an *expert observer* but as stated I am far from claiming to be infallible and in the present case am satisfied that your criticisms must be correct.

I am dear Sir
Yours faithfully
W H Preece

H. R. Quill Esq. D. Sc.

Dear Sir

In reference to yours of the 4th re my record of Rainfall I find that the mistake is in my totalling, which should be – as you pointed out – 5·700. I must regret the error.

Yours faithfully

H. R. Mill Esq

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 MAR 1911

Kept at Chaldon, The Rectory

in the County of Surrey 4

by Rev G. E. Belcher F. C. Bayard

Rain Gauge { Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 542 ft.

Time of Observation

Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
5 JAN 1911

Kept at Homefield Cottage, Cranleigh Common

in the County of Surrey 6

by Arthur F. Jones

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 2 in.
" " " Sea Level 175 ft.

Time of Observation 9 am

Nearest Railway Station
Name Cranleigh
Distance ½ m Direction ESE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at * Park Hill Rise - Croydon

in the County of Surrey - 4

by H. F. Parsons M.D.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
„ „ „ Sea Level 240 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name E. Croydon
Distance ½ m Direction W. from gauge

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

11 FEB 1910

Kept at 126 Waddon New Road
Croydon
in the County of Surrey Ex 9a/8
by Geo Corden F R Met Soc

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. = in.
" " " Sea Level 146 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Waddon
Distance ½ mile Direction SW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Time of Observation 9. a. m.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

1 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Croydon S. (24 Avondale Road)

in the County of Surrey

by George J. Hinde.

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 225 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Selsdon Road
Distance 1 mile Direction East.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

11 JAN 1911

Kept at Stone House, Rose Hill, Dorking

in the County of Surrey 5

by Lt. Colonel J. R. Greenhill

Rain Gauge
Pattern Round
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 240 ft.

Time of Observation 9-45

Nearest Railway Station
Name S. E. & C. R.
Distance 1200 yds Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909.

FORM A2.
BRITISH RAINFALL.
3 JAN 1910

Kept at Lyden Croft

in the County of Surrey (west border of Kent)

by Surgeon-General Charles Planck.

RAIN GAUGE
Pattern Copper Cylinder Cup.
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 212 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Edenbridge Town Station
Distance 2½ miles Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

FORM A2. BRITISH RAINFALL.

2 JAN 1911

Kept at Lyden Croft

in the County of Surrey

2

by Surgeon General Charles Planck

RAIN GAUGE
Pattern
Diameter of top ... in.
Height of top above Ground ... ft. ... in.
" " " Sea Level ... ft.
exactly as in all previous years

Time of Observation

Nearest Railway Station
Name Do Do
Distance ... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

-3 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Egham Park

in the County of Surrey 7

by J. R. FitzGerald

RAIN GAUGE Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " Sea Level ft.

See former returns

Time of Observation 9 a.m

Nearest Railway Station Name Egham
Distance 3/4 mile Direction S.E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

26 JAN 1911

Kept at Ashley Road Epsom

in the County of E. Surrey

by S. C. Russell Esq

HO1 5

Old Gauge

Rain Gauge
Pattern
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.

Time of Observation

Nearest Railway Station
Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL.
2 MAR 1911

Kept at EPSOM WATERWORKS

in the County of SURREY 5

by

Rain Gauge
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 3 ft. 4½ in.
" " " Sea Level 150 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Epsom Town
Distance 250 Yds Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

30 MAR 1911

REGISTER OF RAINFALL IN 1910

Kept at Malquoits Ewhurst

in the County of Surrey 6

by Gardener.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Cranleigh
Distance 3 miles Direction S. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

2 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Charles Hill, Farnham

in the County of Surrey 6

by Mrs Oliver

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 230 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Farnham
Distance 3½m Direction W.N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 192 07.

Kept at Farnham (Short Heath Lodge)

in the County of SURREY

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

FORM A2. BRITISH RAINFALL.

2 JAN 1911

REGISTER OF RAINFALL IN 1910.

Kept at Shortheath. Farnham

in the County of Surrey. 6

by Morris Birkbeck

RAIN GAUGE	Pattern	Casella
	Diameter of top	5" in.
	Height of top above Ground	1 ft. 0 in.
	„ „ „ Sea Level	352 ft.

Time of Observation 9 A.M.

Nearest Railway Station: Name Farnham; Distance 1 mile; Direction N.W.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

AIR MINISTRY.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 192 07.

Kept at Farnham (Crooksbury Ridges)

in the County of SURREY

by

Lat. ______ Long. ______

Time of Observation ______

Nearest Railway Station ______

Diameter of Funnel of Rain Gauge ______ in.

Height of top of Gauge above Ground ______ ft. ______ in.

" " " " Sea Level ______ ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1902

W M L

FORM A.
BRITISH RAINFALL.

Kept at Frensham Hall, Haslemere,

in the County of Surrey,

by Samuel Kevan.

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGIS

FORM A.
BRITISH RAINFALL.
27 JAN 1911

FRIMLEY

Kept at Tomlinscote Lodge

in the County of Surrey 8

by T. Dawson.

RAIN GAUGE
Pattern
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.

Time of Observation 8 a.m

Nearest Railway Station
Name Frimley. L.S.W.R
Distance ¼ m Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
27 JAN 1911

Kept at Hale Cottage, Frimley 8

in the County of Surrey

by Miss Brown

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 210 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Miss Brown
Distance 1/4 mile Direction West.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
26 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Frimley Green

in the County of W. Surrey

by C. C. Haviland Esq

Rain Gauge { Pattern
Diameter of top ______ in.
Height of top above Ground ______ ft. ______ in.
" " " Sea Level ______ ft.

Time of Observation ______

Nearest Railway Station { Name ______
Distance ______ Direction ______

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

26 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at The Waterworks, Frimley Green

in the County of Surrey 8

by Frimley & Farnborough District Water Coy.

RAIN GAUGE
Pattern
Diameter of top 5" in.
Height of top above Ground ft. in.
" " " Sea Level ft.

Time of Observation

Nearest Railway Station ~~Name~~
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

5 JAN 1910

Kept at Tilthams, Godalming

in the County of Surrey

by Col. A.C. Bigg-Wither

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 130 ft.

Time of Observation abt 8-30 A.M.

Nearest Railway Station
Name Farncombe
Distance 1m Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

Kept at Tilthams, Godalming

in the County of Surrey 6

by Col: A. C. Bigg-Wither

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 130 ft.

Time of Observation 8-30 A.M.

Nearest Railway Station
Name Farncombe
Distance 1m Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

3 JAN 1911

Kept at Cross Lanes, Guildford

in the County of Surrey 6

by W. F. Binfield Gardener to F. F. Smallpeice Esq.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 8 in.
" " " Sea Level 200 ft.

Time of Observation 8 a.m.

Nearest Railway Station
Name London Road S.W.R.
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at Hillside, Guildford

in the County of Surrey 6

by Miss H. S. Pitman

RAIN GAUGE
Pattern Howard
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 250 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name London Rd
Distance ½ mile Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

AIR MINISTRY.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 19~~2~~ 07

Kept at Guildford (Newlands Corner)

in the County of SURREY

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

26 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Newlands Corner Guildford

in the County of W. Surrey 6

by Mr. H. Tann

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 550 ft.

Time of Observation

Nearest Railway Station Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

Kept at Templecourt, Guildford

in the County of Surrey

by A. H. Bowles

RAIN GAUGE
Pattern
Diameter of top 8" in.
Height of top above Ground 4 ft. — in.
" " " Sea Level 264 ft.

Time of Observation 9.30 A.M.

Nearest Railway Station
Name Clandon L.S.W.Ry.
Distance 1½ m. Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF ~~RAINFALL~~ IN 1910

FORM 2. BRITISH RAINFALL.

21 JAN 1911

Kept at Courts Hill Haslemere

in the County of Surrey 6

by The Late J. W. Penfold Esqr
Continued by J. Kennard

RAIN GAUGE { Pattern
Diameter of top 8 in.
Height of top above Ground 4 ft. in.
" " " Sea Level 481·2 ft.

Time of Observation 9 a.m.

Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2
BRITISH RAINFALL
JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Highfield, Haslemere

in the County of Surrey 6

by Earl of Altamont

RAIN GAUGE
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 1 ft. 10 in.
" " " Sea Level 690 ft.

Time of Observation 9 am

Nearest Railway Station
Name Haslemere
Distance 1/4 Direction NNW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

6 FEB 1911

HASLEMERE

Kept at Lowder Mill House

in the County of Surrey 6

by A. F. Parbury

RAIN GAUGE Pattern Negretti & Zambra Funnel
Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " " Sea Level 500 ft. 10 in

Time of Observation 9 am

Nearest Railway Station Name Haslemere
Distance 1½ Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Kept at High Ashurst, Dorking

in the County of Surrey

by George Bond

RAIN GAUGE
Pattern
Diameter of top ______ in.
Height of top above Ground ______ ft. ______ in.
" " " Sea Level ______ ft.

Time of Observation

Nearest Railway Station
Name Boxhill L.B.&S.C.R.
Distance 2¾ Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

16 JAN 1911

FORM A2.
BRITISH RAINFALL.

REGISTER OF RAINFALL IN 1910

Kept at Shalley Hall. Haslemere

in the County of Surrey 6

by Henry Simmons

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 15 in.
" " " Sea Level 800 ft.

Time of Observation 9 am

Nearest Railway Station
Name Haslemere
Distance 1½ miles Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Oxd Rmf

FORM A2.
BRITISH RAINFALL.
4 JAN 1910

Kept at Kettlewell Hill, Horsell, Woking.

in the County of Surrey.

by Claude Marzetti.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 9 in.
" " " Sea Level 115 ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Woking.
Distance 3/4 m. Direction S.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909.

FORM A2. BRITISH RAINFALL.

12 JAN 1910

Kept at "Lindilaye" Horsell

in the County of Surrey

by Henry Hotuerstley

C5+ 208

RAIN GAUGE: Pattern Snowdon. Circular
Diameter of top 5 in.
Height of top above Ground 4 ft. 2 in.
" " " Sea Level 120 ft.

Time of Observation 9 a.m. (for preceding 24 hours)

Nearest Railway Station: Name Woking
Distance 1 mile Direction S. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
-5 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Horsley Towers, East Horsley

in the County of Surrey 6

by The Earl of Lovelace

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 2 in.
" " " Sea Level 284 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Horsley
Distance 1 Direction NNW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
